

Understanding the Registry

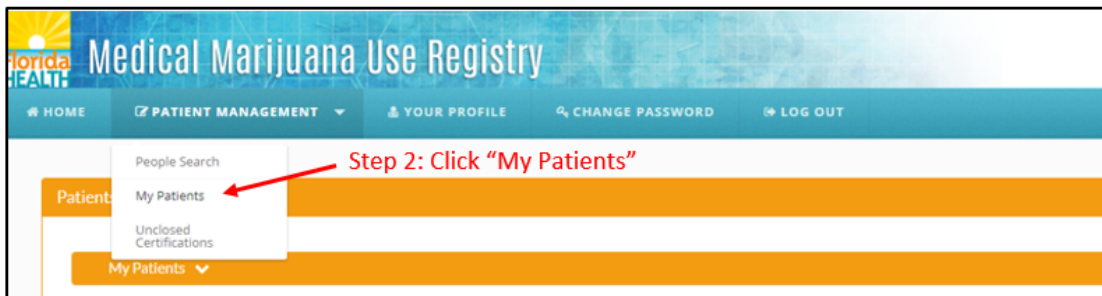

Add an Existing Caregiver

A caregiver can be added to a patient's profile in the Medical Marijuana Use Registry, even if that caregiver is already an existing caregiver to another patient in the Registry. In the occasion that your patient and their caregiver share a single email address, the email address should **only** be added to the caregiver's profile.

Step 1: Log into the Medical Marijuana Use Registry <https://mmuregistry.flhealth.gov/>.

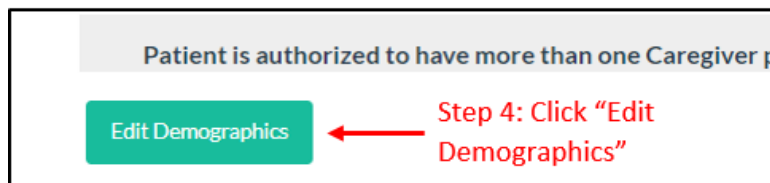

*Get help logging in to the Medical Marijuana Use Registry by [clicking here](#).

Step 2: Navigate to the "PATIENT MANAGEMENT" menu option at the top of the page and click on "My Patients."

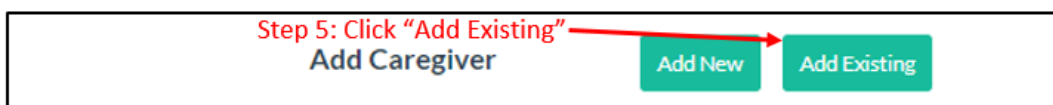

Step 3: Select the patient who will have the caregiver added to their profile.

Step 4: Click "Edit Demographics."

Step 5: Click "Add Existing."

Step 6: Enter the existing caregiver's Last Name, First Name and Date of Birth.

Step 7: Click "Find Caregiver."

The caregiver will be automatically added to the patient profile.

Step 8: Click “Go to Profile Page.”

The screenshot shows a web interface for patient information. At the top left, a notification bubble says "New caregiver added successfully". Below it is a header for "Patient Information P6KR3026". On the left, there is a placeholder for an ID card with the text "192x192" and a link to download a consent form. The main area contains a form with the following fields:
